

Aidon Quality Policy

Aidon's approach to systematic Quality management is based on key clauses of the ISO 9001. Aidon's focus is on continual improvement of its Operational System which includes the Quality management and Quality performance.

Our promise of quality to our customers is that we promise to understand our customers' real needs faster than our competitors, and to develop smart solutions for them.

We promise unique products, which will deliver significant added value and advantage for our customers' business throughout the product's lifetime.

We promise to develop solutions for benefit of the entire energy utility industry, acting in our customers' best interests.

To our personnel we promise an operational environment that offers intellectual challenges and an opportunity for internal entrepreneurship, and innovations as well as an operating model that guarantees the conditions for creating and acquiring new knowledge.

To our owners we promise to continually improve Aidon's business model and by that means increase the company's value.

To our competitors we promise to question the traditional solutions and operating models in the energy utility industry sector and to challenge competitors to engage in development work for the customers' advantage.

We create Aidon quality by keeping these strategic promises in our everyday work and are committed to continuously improve the quality of our products, services, and operations.

Tommi Blomberg, CEO
